

LET IT BE

LETTER OF PERSONAL & PROFESSIONAL REFERENCE

for Mr. Ivaylo Chividzhiyan - Captain and manager of MY "Let It Be"

TO WHOM IT MAY CONCERN

It gives me pleasure to congratulate Captain Chividzhiyan for his great service and good cooperation on-board MY "Let It Be". He was in command of the yacht when I joined as Chief Engineer in April 2016 and after a long commercial track record as Chief Engineer I really benefited and enjoyed being introduced to the fine yachting industry by an established professional Captain with top education, many years in the industry under his belt and well-polished leader profile.

The intention of this letter is to articulate the contribution Captain Chividzhiyan made to preparing the yacht for the high Med season 2016, continued diligence and efforts to create a comfortable and safe environment for his crew and guests. He is a strong team bond and mentor to the international crew on-board, a man with a friendly and calm personality, good manners and fair situation judgement. I had always had his firm support and understanding along.

Along with keeping his track record clean and his working attitude professional he proved himself as a scratch-free Navigator backed with deep seamanship knowledge from his Maritime University background. Being a skilful Captain worked his way from bottom to the top Master Mariner he is always keeping his finger on the pulse of the industry.

Since my joining date up until my disembarkation I have been observing his balanced personality and charismatic leadership in handling both routine and emergency challenging multi-tasks typical for the demanding yachting industry.

I look forward to working with him again should such a chance arise and would without hesitation recommend him for any yacht management or owner who looks for smooth and safe yacht operation and trouble-free teamwork on-board. Captain Chividzhiyan would without doubt be an asset to yacht owners on-board in his future yacht career endeavours.

Date: 30-Sep-2016

Signed Master:

Chief Engineer Milen Kolev
